

Fintax International Growth Fund

As of 2025/01/31

Investment Objective & Strategy

The investment objective of the Fund is to offer capital appreciation over the long term through investment primarily in a basket of international equity markets and currencies. The portfolio will retain a good level of diversification and will invest, directly or indirectly, into a wide range of asset classes that include cash, bonds, equities, commodities and property.

The Fund is ideally suited to investors with a high risk tolerance and an investment horizon of seven years or longer.

In seeking to achieve the investment objective, the Fund will invest primarily in participatory interests of collective investment schemes or other similar schemes whose underlying portfolios provide exposure to a diversified portfolio of equity investments across a wide range of markets and sectors globally, and across a broad range of currencies over time. The Fund may also invest in transferable securities. The Fund may use futures, options and swap contracts and enter into forward foreign exchange transactions and exchange-traded derivatives, for hedging purposes and efficient portfolio management.

Risk Profile

Investors in this portfolio need to be able to tolerate high levels of volatility in the medium term, in order to grow their capital in the long term. There is a reasonable probability of capital loss over time periods shorter than 5 years.

Investment Performance

	Fund	Peer Group Median	Benchmark
YTD return	4.27%	3.74%	3.36%
1 year return	19.40%	15.34%	20.72%

Transaction cut-off time	12 noon Guernsey time, prior business day
Total Expense Ratio (TER)	1.11
Date of TER	2024/12/31

\*The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication as to the annual expenses that could be incurred. These ratios do not represent any current/actual charges or fees.

Please refer to the fund supplement and scheme particulars for a detailed description of the fees and fund facts.

## Quarterly Fund Commentary

### Portfolio Commentary

The Morningstar Global Large-Cap Blend Equity peer group posted a negative return of -2.9% for the quarter and 12.1% for the past 12 months. Fund returns were negative for the quarter with equity returns detracting from performance. Fintax International Growth returned -1.3% over the quarter and 15.2% for the past 12 months.

### Attribution Commentary

Allocations to the broad US market, Financials and US Small-Cap stocks contributed positively to performance, given that these were amongst the few parts of the market that managed to end in positive territory over the quarter. The broad US market benefitted from the continued participation of Large-Cap Growth stocks in the AI rally, whilst Financials and Small-Cap stocks firmed on the back of expectations that they would be key beneficiaries of a second Trump presidency. On the other hand, Emerging Market equities came under pressure, particularly Korean and Chinese equities.

### Positioning Update and Outlook

While valuations are not a timing tool, they offer insight into the expectations embedded in prices. In short, the bar is set exceptionally high for US Large-Caps but less so for other asset classes. We believe this should inform investor thinking about how they position portfolios in the years ahead

The road ahead will be fraught with risks. Among the most commonly cited are:

- US equity valuations that provide little room for error.
- The potential impact of tariffs on businesses.
- Uncertainty surrounding a new administration in Washington.

These are some of the known risks that investors are already thinking about, yet there are always unanticipated developments as well. We believe a diversified, valuation-driven strategy remains the most effective approach to navigate any uncertainty, whether known or unexpected. By focusing on what can be controlled and maintaining discipline, investors can position themselves to face whatever challenges the year ahead may bring.

## Fees applicable to participating shares

Management, Investment Management and Administration fee (per annum):	Sub-Investment Manager Fee (per annum):	Other applicable fees (per annum):

## Investment Performance Disclaimer

The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. **Past performance is not indicative of future returns.**

## Peer Group & Benchmark Disclaimer

**\*\*Prior to April 2023** the performance of the fund on this document was compared against the Morningstar EAA Fund USD Aggressive Allocation peer group median. From 1 April 2023 the performance of the fund on this document will be compared to a new peer group median: Morningstar EAA Fund Global Large Cap Blend Equity.

**\*\*\*Prior to April 2023** the performance of the fund on this document was compared against a benchmark which comprised 90% MSCI AC World NR USD + 10% ICE BofA US 3M Treasury Bill TR USD. From 1 April 2023 the performance of the fund on this document will be compared to a benchmark which comprises 100% MSCI All Country World Index NR USD.

## Risk warnings and important notes

Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.

Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.

Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested.

The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

A schedule of fees and charges and maximum commissions is available on request from the manager.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives.

The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Fund is not permitted to enter into any form of borrowing or loan arrangement with other funds of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.

Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager and/ or Sub-Investment Manager at a particular point in time.
