

Momentum Global Managed Fund (Class B USD)

29 February 2024

Minimum Disclosure Document

Investment objective

The Fund is designed to offer a balance between capital preservation and capital appreciation over the medium to long term through investment in a diversified range of international asset classes and currencies. The Fund is ideally suited to investors with a medium risk tolerance with an investment horizon of 5 years or longer. The Fund intends to achieve its investment objective through a diversified global portfolio primarily consisting of investments in participatory interests of portfolios of collective investment schemes or other similar schemes.

Our investment approach is team based with all portfolio managers having specific areas of research focus and access to and input from the wider Momentum Global Investment Management team.

Source: Morningstar, Momentum Global Investment Management Limited, Northern Trust International Fund Administration Services (Guernsey) Limited. Past performance is not indicative of future returns. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Current asset allocation figures reflect the strategy classification of the collective investment schemes (or similar schemes) held by the Fund and do not look through to the underlying holdings of such schemes. *Global Cash comprises two components: i) prior to 01.01.22 Global Cash was a composite of 50% ICE LIBOR 3M USD; 25% ICE LIBOR 3M EUR; 10% ICE LIBOR 3M GBP; 15% ICE LIBOR 3M JPY; ii) from 01.01.22 to present Global Cash is a composite of 50% ICE BoA 3M US Treasury Bill index; 25% ICE BoA 3M German Treasury Bill index; 10% ICE BoA 3M Sterling Government Bill index; 15% ICE BofA Japan Treasury Bill index. Prior to April 2019 the performance of the fund on this document was compared against a composite benchmark which comprised 65% MSCI AC World, 35% ICE BofAML Global Broad Market.

Manager commentary**

- » Equity markets continued to surprise on the upside with further gains in February. The US has led the way, with returns very similar to the World index, unsurprisingly given that the US market capitalisation now represents over 70% of the world developed markets total. Although the US dominates global markets, it is by no means the only market performing well. Japan has outpaced it this year with a return of 13.1% YTD, including 4.9% in February (in yen terms), and the Nikkei index finally broke through its previous high reached in December 1989.
- » In contrast to equities, bond markets weakened as central banks pushed back on early rate cuts as core measures of inflation remain high and economic activity is proving resilient. Bond yields reacted accordingly, with 2-year treasury yields rising by over 40bps in the month and 10-year yields by 34bps. Uncertainty in markets around rate cuts have arisen following persistent strength in the jobs market and wages rising in real terms at a level which complicates the Fed's task of bringing inflation down to its 2% target.
- » Developed markets, measured by the MSCI World index, returned 4.2% over the month, with the US returning 5.3%. Emerging markets rose 4.8% in local terms. Bond markets returned -1.5% in February, as measured by the ICE BofA Global Broad Market index, with US treasuries returning -1.3%.
- » For investors, continued resilience in the economy and sticky inflation makes it increasingly difficult to predict the path of interest rates, but we remain confident that the monetary policy cycle is close to a turning point and rates in the US, UK and Europe will be cut significantly during the second half of the year. That provides a strong foundation for rising bond and equity markets. The challenge to that prospect is the sharp rise in most equity markets in the past four months, discounting at least some of the more positive environment ahead and driving valuations higher, especially in growth stocks, along with possible complacency around inflationary risks of tight labour markets, high fiscal spending in the US, and geopolitical risks. We remain constructive for risk assets over the course of the year, but expect a period of consolidation in equity markets, while taking opportunities to add to positions in government bonds and selective parts of the credit markets, where yields have again become more attractive following the moves higher this year.

Fee information	per annum (p.a.)
Initial fee	N/A
Ongoing fees	
Investment management fee	0.30%
Management and administration fee	0.21%
Minimum	US\$ 22,000 p.a.

Up to US\$70m	0.04%
From US\$70m to US\$140m	0.03%
Over US\$140m	0.02%
Minimum	US\$ 8,000 p.a.
Custodian fee per transaction	US\$ 25
Performance fee	0.00%
Directors' fee	US\$ 20,000 p.a.
Total Expense Ratio (TER) [†]	1.02%
Financial year-end TER [†]	1.03%

[†] The TERs are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 29.12.23 is based on data for the period from 31.12.22 to 29.12.23 and the financial year-end TER is based on data for the financial year-end to 30.06.23. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk warnings and Important Information. Performance figures prior to 20.10.2011, the inception date of the Class B USD share, have been simulated to reflect the different fee structure by adjusting the Momentum Global Managed Fund Class A USD share's past performance.

Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund. Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives. The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Fund is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each

transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment. Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed. Copies of these scheme particulars, including the Prospectus, Fund Supplement, and the annual accounts of the Scheme, which provide additional information, are available, free of charge, upon request from Momentum Wealth International Limited, La Plaiderie House, La Plaiderie, St Peter Port, Guernsey, GY1 1WF, Telephone +44 (0)1481 735480, or from our website www.momentum.co.gg. A schedule of similarities and differences is also available to South African investors and can be found on our website www.momentum.co.gg.

This report should not be construed as an investment advertisement, or investment advice or guidance or proposal or recommendation in any form whatsoever, whether relating to the Fund or its underlying investments. It is for information purposes only and has been prepared and is made available for the benefit of the investors in the Fund.

While all care has been taken by the Investment Manager in the preparation of the information contained in this report, neither the Manager nor Investment Manager make any representations or give any warranties as to the correctness, accuracy or completeness of the information, nor does either the Manager or Investment Manager assume liability or responsibility for any losses arising from errors or omissions in the information.
