Investment objective

A diversified portfolio, consisting of assets in liquid form and participatory interests of portfolios of collective investment schemes or other similar schemes, which invests into a wide range of asset classes including cash, fixed income, equities, commodities and property. The portfolio aims to provide a balance between capital preservation and capital growth over the full investment cycle. The Fund is ideally suited to investors with a medium risk tolerance with an investment horizon of 3 years or longer.

Fund performance

Cumulative returns

	Rolling 12-month cumulative return				Cumulative performance
	Highest performance		Lowest performance		
1 year	+2.1%	(Jan 2022)	-18.0%	(Oct 2022)	-16.4%
2 years	+19.2%	(Mar 2021)	-18.0%	(Oct 2022)	-11.9%
3 years	+19.2%	(Mar 2021)	-18.0%	(Oct 2022)	-12.9%
5 years	+19.2%	(Mar 2021)	-18.0%	(Oct 2022)	-7.3%
10 years	+19.2%	(Mar 2021)	-18.0%	(Oct 2022)	+1.9%
Since inception	+19.2%	(Mar 2021)	-18.0%	(Oct 2022)	+9.7%

[^] The composite benchmark for performance comparison provided in this document comprised: 1) Between 01.10.2021 and 30.11.2021: 35% MSCI AC World, 40% ICE BofA Global Government, 10% ICE BofA Global Corporate, 5% S&P Global Property, 10% Cash; 2) Prior to 01.10.2021: 30% MSCI AC World, 60% ICE BofA Global Government, 10% Cash. With effect from 01.07.18 the 60% allocation in the FTSE WGBI index was replaced with the ICE BofA Global Government index. Both indices have had similar returns since the inception of the Fund and this change, which has not been applied retrospectively, has no significant impact on the performance comparison. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Since inception figures are since the inception of the Fund.

* Please refer to the fund supplement and scheme particulars for a detailed description of fees and fund facts.

** The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 30.09.22 is based on data for the period from 30.09.21 to 30.09.22 and the financial year-end TER is based on data for the financial year-end to 30.06.22. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

*** Asset allocation figures look through to the holdings of underlying collective investment schemes.

Market commentary

2022 was a brutal year: for households due to the energy and cost of living crisis; for investors as nearly all asset classes fell sharply amidst high levels of uncertainty; and most of all for Ukraine because of Russia's invasion. The strength and persistence of inflation that had been building well before the war and the ensuing central bank policy pivot were the key drivers of asset prices as the Fed Funds rate increased by 4.25% to 4.25-4.5%, well above the predicted 0.9%.

Global equities and bonds suffered steep falls: in the case of bonds one of the worst periods in history as they fell in tandem with equities resulting in a disappointing year for traditional 60/40 equity/bond portfolio. However, opportunities for enhancing returns came from asset class selection, with infrastructure, commodities, gold, and some hedge fund strategies holding up well.

In the final weeks of the year shifting monetary policy was the key narrative as the Fed ended its run of 4 consecutive 75bps hikes with a 50bps hike in its final meeting of the year. The Bank of Japan eased its yield curve control mechanism with expectations of further normalisation in coming months.

Developed markets, measured by the MSCI World index, returned -4.2% over the month, with the US returning -5.8% while the UK returned -1.7% in local currency terms. Emerging markets fell -1.4% in local terms. Bond markets returned 0.2% in December, as measured by the Bank of America Merrill Lynch Global Broad Market index, with US Treasuries returning -0.7%.

Risks and uncertainty have been abundant in 2022, and there remains much to worry about, but most of those risks are now in better balance and in some cases are substantially reduced. 2023 is set to be a difficult year for the global economy and a recession is likely across most of the developed world. It is too early to be adding aggressively to risk but the substantial falls in nearly all asset classes in 2022 have materially improved valuations and we see periods of market weakness in coming months as an opportunity to add to risk to take advantage of the cyclical upturn which will be coming into sight. Diversification as ever will be vital, combining the recovery potential and long-term growth prospects of equities with bonds, including safe-haven government bonds and parts of the credit market which now offer decent nominal and real yields.

				(Custodian fee per transaction: USD 25)
				Distribution fees: 0.00%
				Directors' fees: 0.00%

Risk warnings and important notes

Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.

Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.

Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested.

The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives.

The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Cell is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.

Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed.
