Up to date Fund prices per share are available on www.morningstar.co.za or upon request from the Manager or Administrator.

Investment objective

The Fund focuses primarily on long-term capital growth over the full investment cycle through a relatively high exposure to international growth assets. The portfolio will retain a good level of diversification, however, and will invest into a wide range of asset classes including cash, bonds, equities, commodities and property. The Fund is ideally suited to investors with an investment horizon of 5 years and longer and an intermediate (between moderate and high) risk tolerance.

Fund performance

Cumulative returns

	Rolling 12-month cumulative return			Cumulative performance
	Highest performance		Lowest performance	
1 year	+21.8% (Dec 2019)		-15.5% (Mar 2020)	-1.7%
2 years	+21.8% (Dec 2019)		-15.5% (Mar 2020)	-0.8%
3 years	+21.8% (Dec 2019)		-15.5% (Mar 2020)	+4.7%
5 years	+21.8% (Dec 2019)		-15.5% (Mar 2020)	+20.9%
Since inception	+21.8% (Dec 2019)		-15.5% (Mar 2020)	+45.9%

Source: Morningstar, Lipper Hindsight, Northern Trust International Fund Administration Services (Guernsey) Limited. **Past performance is not indicative of future returns.**

[^] With effect from 01.07.18 the 30% allocation in the FTSE WGBI index was replaced with the ICE BofA Global Government index. Both indices have had similar returns since the inception of the Fund and this change, which has not been applied retrospectively, has no significant impact on the performance comparison.

The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Since inception figures are since the inception of the investment strategy.

* Please refer to the fund supplement and scheme particulars for a detailed description of fees and fund facts.

** The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 30 June 2020 is based on data for the period from 30 June 2019 to 30 June 2020 and the financial year-end TER is based on data for the financial year-end to 30 June 2020. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

*** Asset allocation figures look through to the holdings of underlying collective investment schemes.

Market commentary

The pattern of market performance since the March lows continued unabated in August: global equities buoyant, led by the US and within that tech stocks; high yield bonds, emerging market debt and convertible bonds outperforming safe haven government bonds; precious metals fell slightly; and the dollar weak. The S&P 500 reached new all-time highs, dragging the MSCI World index to a new high, despite many of its other constituents remaining well below previous peaks. Global cases of Covid-19 passed 25 million and the threat of second waves in many countries is still significant. There also remains deep uncertainty about the sustainability and strength of global growth, despite the positive news flow in recent weeks. Markets are likely to continue experiencing higher levels of volatility in the months ahead, with uncertainty heightened by the US Presidential election.

Despite the recovery in leading economies to date, there remains deep uncertainty about the sustainability and strength of growth, and that uncertainty has been heightened by the possibility of second waves and/or extended first waves of Covid-19 in many countries. Encouragingly, fatalities and hospitalisations continued to decline in many regions however concerns remain, especially with the northern hemisphere winter approaching.

Emerging markets returned 2.2% in August in dollar terms. Meanwhile developed markets, measured by the MSCI World index, returned 6.7%, led by the US and Japan, with gains of 7.1% and 8.2% respectively.

Bond markets fell overall in August, with US investment grade corporate bonds returning -1.4% compared with -1.2% from Treasuries, while high yield bonds returned 1.0%.

2021 promises to be a year of robust recovery in economies and corporate earnings, and risk assets will have continuing strong support from ultra-loose monetary policy for years ahead. Furthermore, markets are not discounting the early roll-out of a vaccine; any good news on this front would be a major boost to confidence and sentiment and might well herald a period of significant outperformance by value stocks over growth. We therefore expect markets to move higher through 2021 and would use setbacks in the months ahead as a buying opportunity.

				<i>subject to a minimum of USD 8,000 per annum.</i> (Custodian fee per transaction: USD 25)
				Distribution fees: 0.00%
				Directors' fees: 0.00%

Risk warnings and important notes

Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.

Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.

The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.

Fluctuations in the value of the underlying funds, the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.

Deductions of charges and expenses mean that you may not get back the amount you invested.

The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.

Higher risk investments may be subject to sudden and larger falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.

Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives.

The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.

Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.

No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Cell is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.

While derivative instruments may be used for hedging purposes, the risk remains that the relevant instrument may not necessarily fully correlate to the investments in the Fund and accordingly not fully reflect changes in the value of the investment, giving rise to potential net losses.

Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity. Banks and dealers will normally act as principals and usually each transaction is negotiated on an individual basis.

The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.

Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.

Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.

This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed.
